

Weatherization Crew Member

Job Description:

The Weatherization Program Crew Member plays a crucial role in the implementation of weatherization initiatives in the state of Pennsylvania. As a part of the crew, you will work in teams to improve energy efficiency and reduce energy costs for low-income households and community buildings. Your responsibilities will include conducting weatherization assessments, performing energy-saving measures, and ensuring the successful completion of weatherization projects.

Responsibilities:

Installation of Energy-Saving Measures: Install weatherization materials and equipment, such as insulation, weatherstripping, caulking, and energy-efficient lighting. Ensure proper installation techniques and adherence to safety guidelines.

Air Sealing and Insulation: Perform air sealing measures to reduce drafts and energy loss. Install insulation in attics, walls, basements, and crawlspaces to enhance energy efficiency.

Health and Safety Measures: Follow safety protocols and guidelines during all weatherization activities. Use personal protective equipment (PPE) as required and promote a safe working environment for the crew and occupants of the buildings.

Documentation and Reporting: Maintain accurate records of work performed, including documentation of materials used, measurements, and energy savings achieved. Complete required paperwork and reports promptly.

Customer Interaction: Interact professionally and courteously with clients during weatherization activities. Address their questions and concerns, provide information on energy-saving practices, and ensure customer satisfaction.

Team Collaboration: Collaborate effectively with other crew members, contractors, and program staff to ensure smooth project execution. Coordinate tasks, share knowledge and expertise, and support one another in meeting project goals. Perform any duties that are required by Weatherization director.

Training and Development: Participate in training programs and workshops to enhance knowledge of weatherization techniques, energy efficiency practices, and emerging technologies.

Qualifications:

High school diploma or equivalent.

Previous experience in construction, building maintenance, or related field is preferred.

Knowledge of weatherization techniques, energy efficiency, and building science is a plus.

Ability to work with hand and power tools, measuring equipment, and other weatherization tools.

Familiarity with safety practices and protocols in construction or related environments.

Strong attention to detail and ability to follow instructions accurately.

Excellent teamwork and communication skills.

Physical stamina and ability to perform tasks that involve bending, lifting, and working in confined spaces.

A valid driver's license is preferred.

Note: The above job description provides a general overview of the role of a Weatherization Program Crew Member in Pennsylvania. Specific requirements and responsibilities may vary based on the employer and the nature of the weatherization program.
